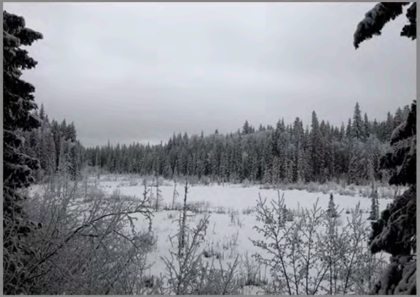
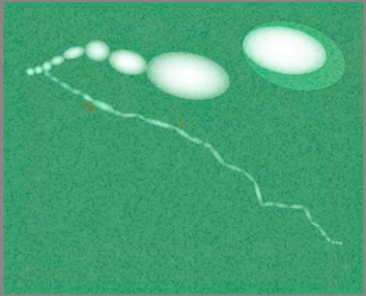
SECTION 3

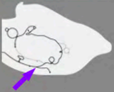
2007-08

2010

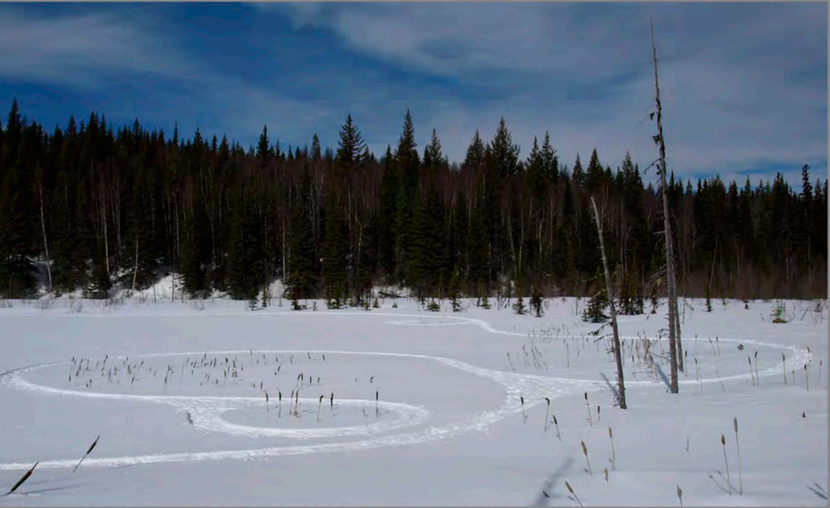
the east trail is 1.6 km in length



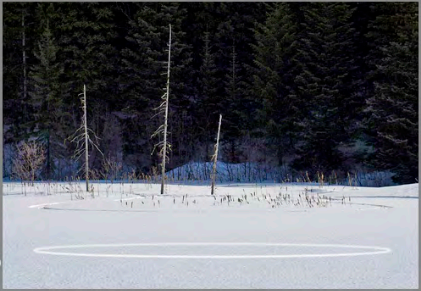


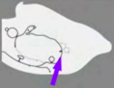


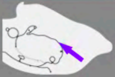
portal (approach from the east trail)

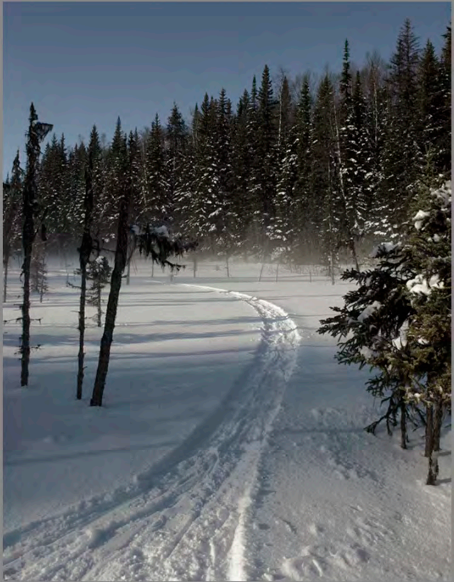


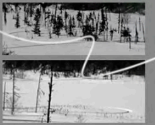
portal (approach from the west) trail

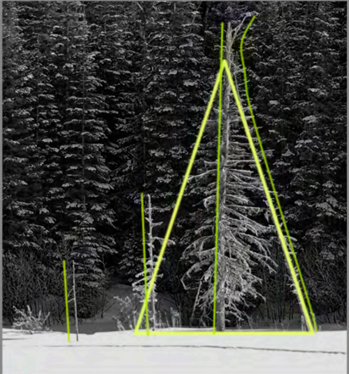


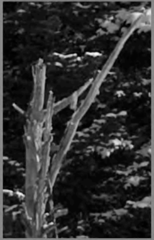












Right: There are four dead trees close to the small pond #4. Starting from left; 1 small, 1 medium, 1 medium/large and 1 medium/oblique that is partially curved because it rests on the other. The meeting point of these two trees forms half of a Golden triangle (yellow lines). The green lines = transition from small to large.

Left: The curve above the meeting of the two trees is a branch of the medium/large tree. For the meeting of the curve and the almost straight line, please view Transition 2.
